## CoTs cases and related dispute t

1 must remain with my commitment to the people involved with the CoTs cases. The commitment is representing their frustrations and finding a recokition to the lisente.

The resolution to the ks um, is referenced in your letter of $13^{\text {th }}$ September 2005, where you state 7 agree that there should be finality for all outstanding "COT" cases and related disputes I believe that the most effective way to deal with these is for me to appoht an independent tssasior to review the status of all outstanding claims".

This agreement I believe ts the only way a sathactory resolution can be achieved.

I resells that my only influence is that of persuading you and I must endeavour to keep the door open on this issue.

Yours anceroly

somitor Barnaby Joyous The Nation ale senator for Queensland
$28^{\text {th }}$ January 2008

Ms Clare O'Reilly
Australian Communications \& Media Authority Level 15, Tower 1, Darling Park
201 Sussex Street
Sydney NSW
Dear Ms O'Reilly

## Letter one

The information following this paragraph is an almost identical replica of the content of my letter dated $19^{\text {th }}$ January 2008, to Ms Jodi Ross, Principal Lawyer ACMA. Ms Ross informed me today, via email that you are now my contact within the ACMA, until her return 31 March. So there is no confusion as to my concerns regarding the charges being applied by the ACMA, for my latest FOI requests, I have forwarded this correspondence entitle Letter one.

I refer you to the attached letter dated $15^{\text {th }}$ September 2005, from Senator Barnaby Joyce, to me noting: "As you are aware, I met a delegation of CoT representatives in Brisbane in July 2005. At this meeting I made an tundertaking to assist the group in seeking Independent Commercial Loss Assessment relating to claims against Telstra. As a result of my thorough review of the relevant Telstra sale legislation, I proposed a number of amendments which were delivered to Minister Coonan. In addition to my request, I sought from the Minister closure of any compensatory commitments given by the Minister or Telstra and outstanding legal issues. In response, I am pleased to inform you thot the Minister has agreed there needs to be finality of outstanding CoT cases and related disputes. The Minister has advised she will appoint an independent assessor to review the status of outstanding claims and provide a basis for these to be resolved.

I would like you to understand that I could only have achieved this positive outcome on your behalf if I voted for the Telstra privatisation legislation.

My involvement in this DCITA assessment process in 2006 cost me quite a few thousand dollars and it turned out to be a sham anyway, as can be seen by the attached copy of an email sent by Senator Coonan's advisor (David Lever) to the TIO (John Pinnock) on $21^{\text {st }}$ December 2005, noting that: "The assessment will focus on process rather than the merits of claims, including whether all available dispute resolution mechanisms have been used."

The Federal Liberal Government clearly misled Senator Joyce in a deliberate move to secure his vote so they could pass the legislation required for the privatisation of Telstra but, once this aim
had been achieved, Senator Coonan executed a 'back-flip' on the Government's commitment to Senator Joyce. Mr Lever's email is quite clear - neither he nor the Minister ever had any intention of honouring the commitment given to Senator Joyce. Not only did Senator Coonan and Mr Lever go back on their promise to Senator Joyce, but Mr Lever wrote to me on 17 ${ }^{\text {th }}$ March 2006 (attached), before I signed the DCITA assessment agreement, guaranteeing that: "If the material you have provided to the Department as part of the independent assessment process indicates that Telstra or its employees have committed criminal offences in connection with your arbitration, we will refer the matter to the relevant authority." The ACMA, the TIO and DCITA all know that Telstra relied on fundamentally flawed and manufactured reports to support their defence of my arbitration claim, but this evidence was not referred to "...the relevant authority" as Mr Lever promised. Mr Lever's promise to involve "...the relevant authority" was what brought me to the decision to join the DCITA process but again the department back-flipped on their written commitment.

The fourth email attached here, dated $19^{\text {th }}$ October 2005, from David Lever, indicates that I was not the only person misled by a promise of individual assessment and a back-flip to an 'assessment of process' only. Mr Lever notes that 'Jodi' "... may be getting confused about what the assessment is meant to do (or at least what we are recommending) i.e. an assessment of process and what further resolution channels may be available to people. We are arguing strongly that the assessment should not be about the merits of each case." Whoever 'Jodi' is it seems, from Mr Lever's comments, that she expected the DCITA process to assess each claim, not just the process and how it worked. How much more proof does the ACMA really need? It is obvious that the DCITA assessment process did not, and was never intended to, assess the claims submitted by the COTS on their individual merits.

The negation of these Government guarantees is an enormous indictment against Australian democracy.

Because of the expense of the allegedly independent and, as it turned out, quite useless, DCITA assessment process, I can now not afford the $\$ 300.00$ price tag that the ACMA has put on my latest FOI request, as quoted in your letter of $18^{\text {th }}$ January 2008, and I am therefore asking that the ACMA please take into account how the Department misled me into spending thousands of dollars in 2006 when there never was any intention of independently assessing my claim material on its merit, and so waive the current FOI charges as a gesture of goodwill.

Thank you,

[^0]$28^{\text {th }}$ January 2008

Ms Clare O'Reilly
Principal Lawyer

Dear Ms O'Reilly,

## Letter two - FOI request dated 6 December 2007.

In my earlier letter of today's date (letter number one) I have described the grave miscarriage of justice I have suffered, from 1988 onwards, and explained how this should have been (but was not) settled by an AUSTEL-facilitated arbitration in 1994.

My first letter also asked ACMA to waive all the charges associated with my December FOI request, because of the aforementioned miscarriage of justice. Although I am still hopeful that ACMA will eventually agree to waive the FOI charges, I have now been advised that, while I wait for ACMA's final decision, I should forward the enclosed deposit of $\$ 72.92$, to 'get the ball rolling'.

I remain hopeful that the FOI charge will be waived in full.

Alan Smith
(Cheque for $\$ 75.00$ enclosed)

## The Hon David Hawker

Federal Member for Wannon
Parliament House
Canberta 2600
Dear Mr Hawker,
By now you would have received my letter dated $21^{\text {st }}$ January 2008 , which was sent both by email, and in the post to your Electorate Office at 190 Gray Street, Hamilton.

Another letter, dated $19^{\text {th }}$ January 2008, to Ms Jodi Ross, Principal Lawyer at the ACMA, was attached to my letter to you - the letter and attachments to Ms Ross explained how and I was misled into believing that the then-Minister for Communications would honour the commitment she gave to Senator Joyce in return for his crucial vote regarding the Telstra privatisation bill. The new evidence I have just received, and which was attached to my letter to Ms Ross, clearly shows that none of the claim material I provided to the Minister's allegedly independent assessment process, or even any of the material you submitted to her office on my behalf, was ever assessed on its merits. I wonder how you feel now, knowing that even the claim material you provided to the Minister on my behalf wasn't assessed on its merits? This does, however, demonstrate just how powerful Telstra is since they obviously have enough inside Government influence to be able to change one Minister's commitment to another (i.e. Senator Coonan's commitment to Senator Joyce).

The attached brief summary includes some of the issues I raised in my two letters to Ms Ross, on $19^{\text {th }}$ and $28^{\text {th }}$ January; my letter dated $28^{\text {th }}$ January to Ms O'Reilly of the ACMA; and my letter to you on $21^{\text {st }}$ January.

Since I first started corresponding with you in 1992, regarding my unresolved Telstra issues, I have always been open and honest in my efforts to have my Telstra matters correctly and transparently assessed but, even after two separate assessment processes and a legal arbitration, this has never happened.

I would be grateful if you would let me know, as soon as possible, if there is anything you disagree with in the attached "Chronology" document.

Once again, I must thank you and the staff in your office in Hamilton for your patience over the years.

Sincerely,

Alan Smith

324 C

## The Hon David Hawker

Speaker in the House of Representatives
Parliament House
Canberra 2600

## Dear Mr Hawker,

As you will now know, from my letters of $21^{\text {sh }}$ and $30^{\text {th }}$ January 2008 and the attached copies of letters, dated $19^{\text {th }}$ and $28^{\text {th }}$ January, to Jodi Ross and Claire O'Reilly at ACMA, even documents you forwarded to the Minister on my behalf were never assessed on their merits by assessors appointed by the Minister because, as my letters to ACMA show, Senator Coonan's agents actually admitted, in internal emails, that they never had any intention of assessing my claim material on the merit of the information provided, or that of any other COT claimants either, and yet they let us waste our money preparing and forwarding our claim documents in the belief that they would be properly independently assessed.
I have always endeavoured to be totally open and honest in my dealings with your office regarding Telstra and, as you know, 1 have always sought your approval in the past before sending any correspondence that referred to you. I followed this process again in my letter to you on $30^{\text {ti }}$ January when I asked if you would "... let me know, as soon as possible, if there is anything you disagree with in the attached "Chronology"..." (a one-page document). I do not expect a response to that question at the present, but I believe it is important that you have the attached document as soon as possible. This attached document is copy of an email from Ronda Fienberg, my Melbourne-based secretary and it is startling information, directly related to my allegations regarding Senator Coonan's allegedly 'independent' assessment process.

As you can see, yesterday ( $1^{4}$ February 2008) Ronda received confirmation from Senator Coonan's office that they had deleted (without opening or reading) two emails Ronda had sent directly to Senator Coonan on my behalf in 2006. Both these emails related to Senator Coonan's so-called 'independent' assessment process - the process in which these documents should have been assessed. One of the documents is dated 23 April 2006 and the other 25 July 2006, but they were deleted yesterday, $1^{\text {a }}$ February 2008 at 15:56:23 and 16:56:35 respectively.

Perhaps the correspondence I have recently sent to ACMA, Senator Joyce and your office, in relation to DCITA's misleading and deceptive conduct, has been forwarded to the Minister's office for investigation and this may have prompted Senator Coonan's advisors to shred documents and delete emails regarding my unresolved Telstra matters. Whatever the reason for deleting unread claim related emails, it seems that Senator Coonan's people were not aware that deleting the emails without opening them could automatically send a message back to the sender (in this case, my Melbourne-based secretary) to notify the sender that the message had been deleted without being opened (see attached document). As you know, many of my 'independent'
claim assessment documents were emailed to Senator Coonan and many of them included multiple pages.

As you are not only the Speaker in the House of Representatives but also my Federal Member of Parliament, you have a duty of care to instigate an investigation into why the Minister's office misled us both into believing that my unresolved Telstra related matters would be assessed on their merits when this new evidence proves that my claim related emails were not even opened in Senator Coonan's office, at the time of this alleged independent government facilitated assessment process.

Clearly the one crucial vote that the Govemment needed to pass the Telstra privatisation (Senator Barnaby Joyce's vote) was given on the base of a commitment that Senator Coonan never had any intention of honouring - that an independent assessor would be appointed to value the COT claimants' evidence - and then some of the evidence I forwarded was never even read, let alone assessed. This is a sad indictment of the Australian justice system and I am owed an explanation.

Please inform me as soon as possible, that you have instigated an inquiry into this misleading and deceptive conduct as soon as possible. How can a Senator, elected by the Australian public, be allowed to get away with executing such a complete back-flip on a commitment given to another Senator?

Alan Smith
cc Senator Barnaby Joyce, Senator for the Nationals Queensland (Parliament House Canberra)

Well, here's a couple of interesting emails that landed in my email inbox this afternoon! As you can see, Senator Coonan's office must be having a big clean up of their emails and these two emails l've sent on your behalf back in 2006 have just been deleted -- today! Can a Senator legally delete correspondence from a citizen without reading it?

## COT MATTERS

1 am enclosing the latest drail of the Fast Track Arbitration Procedure which has been forwarded to me today by Messrs Minter Ellison Morris Fletcher.

I have not yet had an opportunity to closely peruse the document. I shall do so over the Easter break with a view to forming an oplnion as to whether I consider it to be in a form that I would recommend the parties signt.

I underscand all clatmanis will be in Melbourne on Friday, Bth April 1994. I propose that the parties meet at the offices of Messrs Minter Ellison Morris Fletcher on that day with a view to finalising negotiations.

Please let me know if you will be avallable to attend the meeting on ath Aprll at a time to be advised.

Yours sincergely

## Telecom

 CUSTOMER AFFAiRS

David
Peter Bartlett tells me that Gramme Schooner is purring pressure on Gordon Hughes to read the Auster Report and see if it contains anything which i would necessitate a change in the Arbitration Rules. I told Mr Bartlett to tell Dr Hughes that Telecoms world seriously object to such a course of action.

Dr Hughes is now convinced that his proposal to have a joint meeting to finalise the rules tomorrow is useless. I have told Mr Beateat that the only basis on which Telecoms ruonld attend a meeting is to formally sign the rules - no fut her discussion or negotiation to be entered into.

Dr Hughes seems to have dug a bit of a hole for himself
Mr Bartlett is urging Dr Hughes to notify COTS the he has decided that the rules are now finalised anarfair and reasonable and mast be signed by COTS and Telecoms tomorrow. Warwick Smith supports him in this. Dr Hughes has agreed to talk to Mr Scorer in an attempt to convince high to sign the rules tomorrow. I understand that Amazed Davis is ready to sign.

## Mr Robin Davey

Austel
By Facsimile: 8287384

## Dear Mr Davey

## Preliminary Draft Austel Report ("the Report")

I refer to my previous letter dated 8 April 1994 and our subsequent conversation, and .
In relation to the key issues of major concem to Telecom which I raised in that letter, I confirm the following:

1. In relation to point 5, you have accepted Telecom's requested amendment;
2. In relation to point 4, you have agreed to withdraw the reference in the Report to the potential existence of 120,000 COT-type customers and replace it with a reference to the potential existence of "some hundreds" of COT-type customers; and
3. In relation to point 2, you have agreed to withdraw the allegation that Mr lan Campben misled the Senate, and you will also alter the wording in respect of the reference in the Report to the statements made by Telecom to Mr Wright, to read that the statements had the "potential to mistead".

I also confirm your advice that you will inchude a recommendation in the Report that Austel will settle with the carriers a standard of service which they will offer, and that you will include a statement in the Report that Austel will move to determine limitations on carriers' liabilities under section 121 of the Telecommunications $A d$ as a matter of urgency.

## Key Issues Which Remain of Major Concern to Telecom

Telecom still holds the following concerns about the key issues which were raised in my previous letter.

1. In respect of the first key issue raised in my previous letter, you have refused to withdraw the disputed reference on the grounds that the words of paragraphs 8.38 and 8.39 of the Report only indicate that the Chairman of Telecom did not disclose the true nature and extent of COT case problems, and do not specifically state that the Chaiman of Telecom misled the then Minister for Communications, Mr David Beddall.

Telecom's concem is that this statement comes directly under a heading "COT case allegations" and a clear statement in the first line that Telecom misled the Parliament. Telecom is of the view that the juxtaposition of these paragraphs carries the cleas inference that the Chairman of Telecom misled the then Minister for Communications, Mr David Beddall.

R11828

Telecom is also concemed that the Report purports to be en independent reviow of the COT aliegations by Austel, which holds ISsof out as being disassociated from the matters under review. However, the evidence led to support Mrs Garns' aliogations that Telecom has misled the Parliament refers to documents evidencing a personal disagreement between the Chaiman of Austel and Telecom as to the efficacy of a ministerial briefing note. Telecom disputes the Chaimman of Austofs viows on this matter and is of the view that unless the allegation is removed from the Report, the Report will still imply that the Chairman of Tolecom misied the then Minister. This is unacceptable to Telecom.

Telecom is also concemed that AUSTEL does not appear to have consulied the previous Minister on his views on this matter. Telecom's view is that this allegation must be removed from the Report.
2. In respect of the second key issue raised in my previous letter, I note your advice that you propose to retain the altered relerence to Mrs Garms' allegations in respect of Mr Keith Wright. Telecom still has the following concems with your proposal. Telecom is concemed that it has not been given sufficient time to contact the officer who gave the briefing and obtain a statement of his understanding of Telecom's systerss and to prepare a proper response in relation to this matter for inctusion in the Report. Telecom is of the view that if this allegation is to remain, then Telecom shoutd be given adequate time to prepare a formal response for publication in the Report.
3. In respect of the third key issue raised in my previous letter, I note your advice that you propose to include the findings of the inikial Austratian Federal Police (AFP) investigation into Mrs Garm's allegations of comuption to make it clear that there was no evidence to support her allegations, and also to withdraw any specific reference to Telecom having misled the AFP. However, Telecom's concem is that this statement comes directly under the heading "COT case allegations" and is presented in the context of a section where allegations by Mrs Garms that Telecom misled the Australian Federal Police are presented. This clearly infers that Telecom misled the Australian Federal Police in the conduct of their investigation.

Telecom is concemed that this makes the Report misleading for two reasons. First, the statements relied upon by Mrs Garms to support her allegation, were not relevant to the subject matter of the investigation carried out by the Australian Federal Police. It would therefore not have affected the outcome of the Australian Federal Police investigation which related to the physical disconnection of her service.

Secondly, Mrs Garms' allegation that Teiecom is comupt and has misled the AFP, is untrue. The basis of her allegation is that Mr Bennett's purported statement to the AFP, that Telecom did not have access to check her old Commander telephone system, is not consistent with the file note dated 31 May 1990 . Her allegation is that Mr Bennett's statement is unture because Telecom had physical access to view her equipment, as evidenced by the file note.

Access to check equipment from a tectnical point of view refers to the ability to physically access equipment and the capacity to disassemble the equipment for testing and repair. The file note indicates that Mrs Garms had not taken out a maintenance contract for that equipment with Telecom and the equipment was privately instathed and maintained. From a technical perspective Telecom did not have access to check the equipment, in that it did not have Mrs Garms' authority or the responsibility to disassemble the equipment for testing and repair. Therefore the two statements are consistent.

Mrs Garms has accused Telacom of corruption twice, and has also made allegations of comuption against the AFP. The first allegettion of comption egainst Telecom has been investigated by the AFP end found to be without foundation. The allegation of corruption against the AFP has also been lovestigated and found to be without foundation. The allegations which Austel now seeks to re-state in the Report in an authortative way have also been referred to the AFP and i" is Telecom's understanding that, atter further consideration, the AFP does not consider that the matter needs to be reviewed further. Telecom considers that the proposed changes to the Report are insulficient and considers that the allegations repeated in the Report are unwarranted and must be wilhdrawn.

Telecom is also concemed that Mr MacMahon has been incorrectily informed that the AFP oflicer who conducted the original inquiry into Tefecom, has been found guily of corruption charges and is in prison. I have taken this matter up with the AFP who have advised me that this is totally unfounded. As Austel appear to have been seriously misinformed about the status of the AFP inquiries and AFP personnel, Telecom considers that any matters dealing with AFP investigations must be formally cleared with the AFP.

Telecom atso considers that it should be given the opportunity to provide specific responses to any allegations of COT members re-stated in the Report, and that adequate time should be allowed for this purpose.
4. In respect of the fourth key issue raised in my previous letter, Telecom is still concemed that, in the absence of agreed service standands, the proposed reference to "some hundreds" of customers has the potential to be misleading.

At our meeting on 6 April 1994, Mr Ian Campbell indicated that Telecom accepted that the number of customers reporting DNF-type problems might be more than 50. However, in the absence of agreed service standards, $h$ is not possible to define objectively how many customers are not receiving a satisfactory level of overall senvice.

The number of customers currently in serious dispute with Telecom on all servicerelated matters of which Telecom is aware, is substantially less than 100. Accordingly Telecom's view is that the only reference made in the Report to the number of potential COT customers, shouid be the originat reference to "more than $50^{\circ}$ customers.

Telecom considers that the Report's findings which purport to be derived from the information in the Bell Canada Intemational (BCI) report, are misleading in that they focus on minor issues and ignore the primary findings of the BCl report in relation to those same issues, and are also in some cases factually incorrect. The Report is also unbalanced because the findings do not deal with the primary findings of the BCl report but only deal with peripheral issues favourable to the views of the COT customers.

In the concluding section of the section of the Report dealing with BCI, Austel makes no reference to the primary findings of BCl , but instead focuses on the following statement.
"The BCl report suggests the following weaknesses:

- potential problems attributable to older technology
- inadequacies in monitoring and testing equipment
- inadequacies of maintenance spares
- inadequacies of maintenance procedures
- potential problems attributable to number assignment procedures."

The executive summery of the 8 BCl report directly contradicts a number of these points. It states that the testing and faulk locating equipment and systerns, as well as procedures to detect and correct network troubles wore found to be comparable with wortd standards...". It also states that the TEKELECRCCS7 test system with enhancements by Telecom is the most powerful tool available in a digitad network." In viow of this, Telecom considers that the Report is factually incorrect. Telecom is also of the view that the statement that BCI found inadequacies of maintenance spares, is factually incorrect

If the following amendments are made, this section of the Report will be more be more balanced. The amendments inctude:

- relating Telecom's responses to COT issues and dealing with them together,
- correcting the errors of fact in Auster's findings in relation to technical matters.
- refering to the fact that supplementary testing addresses Austefs concems regarding the original testing, and
- provide prominence to the primary findings of BCI in the relevant sub-section of the Report dealing with Austers findings.

In addition, opportunity should be given for Bell Canada Intemational to comment on this material before il is published.

Il is also critical to point out that repetition of the unsubstantiated allegations of the four COT customer (unsubstantiated because AUSTEL recognises that an arbitrator will make these final determinations) without at the same time offering Telecom's response to those claims, is misleading and biased.

AUSTEL must either (1) not publish four COT customer's allegations at all, or (2) publish them alongside Telecom's responses, state that AUSTEL does not take one side or the offer since the allegations will be deternined by an arbitrator, point out how these disputes illustrate defects IN THE PROCESS of Telecom's process for resolving customers' complaints, and proceed to make recommendations on IMPROVING THE PROCESS. This will involve much new material being inserted in the Reporl to present our position on each quoted COT claim.

Finally, Telecom understands that you may amend the Report to reflect concems raised with you by the COT customers. As these changes may raise further issues of concem to Telecom, Telecom is of the view that it should have an adequate opportunity to comment on any such changes.

Yours sincerely,

Steve Elack
GROUP GENERAL MANAGER
CUSTOMER AFFAIRS

Size of the complaints problems
I raised the extfuomeis survey Rob Davey referred to mi Drasard (Senate Estimates Committee 25/2,144) isth fohn MacMahion (AuSTEN)

- it vas apparently rem by (T) at AUSTELS request in an attempt to see how wedelthe problems are
- E provided the result IC AUSTEL as 'commercial on confidence'
- Hey will be covered or Austen's report.
- $10 \%$ of thasesurveged said they had expeneneed the same sorts of problems (as the cor people)
- $4 \%$ (Vim nets one of otis is of the total or of the $10 \%$. said Hey had been affected eerowidy cr very send

Tho is the basis for AUSTEL's crew that the Dye of the problem is ougniflcantly greater than (TI's claim of 50.

$$
\int_{\substack{49 \\ \text { bospere }}} 3268
$$

The survey, through a series of detalied questions focussing on incoming calis to the business, found a total of $4 \%$ who fett that recent difficulties essociated with incoming calis had affected their business adversely to a significant or very atgnificant extert.

The results showed no silgnlficant difference between the selected exchanges and the control areas included in the survey.

This figure was derived from two questions asked of all respondents. The first related to difficulties experienced whth incoming cails over the last month by the business. The second (asked of all respondents regardless of their response to the first question) related to comments received from callers regarding difficulties in getting through to the business in the last month.

A total of $8 \%$ of all businesges stated they had experienced problems themselves; $5 \%$ had, by inference from comments made by callers. assumed they had problems; and_ $8 \%$ clamed they had both experienced problems themeetves and also recelved comments from callere regajding difficulties in getting through to the business.

However, the maiority percelved these not to have had any or only a minimal effect on their business.

Problems experienced by callers to the business appeared to influence the extent to which incoming calls were considered to seriously effect the business.

Businesses who felt that problems with incoming calls had significantly or very significantly effected their business tended -

- to claim they had experienced multiple incoming call problems within the last month
- to have experienced incoming call problems at least every few days to have heightened awareness of potential problems that may exist with the telephone service in their area.

Copyright : Telecom Australia

Compared to the overall business population the businesses claiming incorning call problems had very/significantly affected their business were found to have.

- more lines to their premises
- more fhandsets attached directly to lines (where there was no small business system)
- a higher incidence of other equipment attached to the lines

No differences were apparent between the nature of business of these customers and the general business population.

73\% of customers who felt the problems associated with incoming calls hact seriousty affected their business had reportod the problems to Telecom with varying degrees of success regarding resokution.

Whan irvited at the end of the survey, $\mathbf{6 4 \%}$ agreed they would like Telecom to follow up their problems.

These customers will form the basis of the second, diagnostic stage which will be carried out by Telecom in order to determine the underlying cause of the problems believed to exist with incoming calls. During this stage Telecom will investigate both the Telecom network and the customers equipment; and their usage of the telaphone service.

## TELECOM - $\mathbb{N}$ - CONFIDENCE

Table 1 shows the response to the two questions asked of all respondents to elicit the incidence of incoming call problems over the lust month.

Firstly survey respondents were asked if the business had experienced olifficultios with incoming calls over the last month - $16 \%$ indicated they had. All respondents (even those who had not experienced any difficulties) were then asked whether they had received any comments from callers regarding difficulties in getting through to the business and a total of $13 \%$ stated they had.

This in fact represented a total of 21\% of all businesses in the survey who assumed - either from their own experience, or comments made by callers that there had been problems with incoming calls to their business during the last month.

47\% of these respondents claimed incoming call problems had had an adverse affect on their business.

19\% of all businesses with incoming call problems felt these had adversely affected the business significantly or very significantly $4 \%$ of all business): 26\% perceived the affect as slight.

The table opposite (Table regarding ...

- . the number being constantly engaged (C5a)

## 6. CONCLUSION

The regime of test calls established to verify the quality of the services at Cape Bridgewater must be considered to flawed and erroneous.

The fact that overlap of test calls from numerous locations \& types of tests to specific test numbers indicates a serious flaw in the testing process, or simply that the tests were not carried completed successfuily as stated.

As the Cape Bridgewater RSM is not a telephone exchange, no replicable tests were carried out to verify the conditions being experienced by the subscribers.

The so called tests reported to have taken place at Cape Bridgewater RSM cannot be verified by examination of the normal exchange based call data, neither incoming or outgoing. In addition, the failure to carry out the number \& duration of the prescribed tests (eg. 20 calls per service, each held for 120 seconds), indicate the erroneous \& fraudulent nature of the report to Austel.

The failure of Telstra to carry out standard performance tests (eg. bit error rate etc), at the multiplexer (RSM) at Cape Bridgewater is alarming \& of concern. CCAS data over recent times (eg. 2004-2006), indicate a continuing \& worsening level of "Outgoing Released During Setup" calls (ORDS). These reports on the CCAS data indicate that the calls are not successful in the call set up stage of the connection or is lost in the network

Such reports would indicate that the service was operating in a very unsatisfactory manner. The common factor being the multiplexer system \& digital link, Portland exchange or subscriber usage.

However, the continuing report of phantom calls, tost faxes \& missed calls ALL point to the network including the RSM at Cape Bridgewater being the source of the problem. As a significantly bit error rate in the data network can present it self to the end user in many different ways. Unfortunately all being a degradation of services

30 July 2009

Mr Crowley
Chief Executive Officer
Institute of Arbitrators and Mediators Australia
C/- The (IAMA) Ethics and Professional Affairs Committee
PO Box 134 Law Courts
MELBOURNE VIC 8010

Dear Sir
I am aware that the (IAMA) Ethics and Professional Affairs Committee are investigating Alan Smith's arbitration matters.

During my role as the CoTs (Casualties of Telstra) spokesperson, I was constantly briefed by the CoT participants during their respective TIO administered Fast Track arbitration procedures.

I clearly recall having many discussions with Alan Smith over his facsimiles that went missing/lost during his arbitration.

A copy of the letter dated 4 August 1998 that I sent to Alan Smith is enclosed.
Also enclosed is my statutory declaration addressing these matters in order to assist the IIAMA in their current investigation into the Smith arbitration matters.

Yours sincerely

Dear Alan,
Re: Facsimiles transmitted to Hunt \& Hunt, Melbourne Office, addressed to Dr Hughes, the appointed Arbitrator of the Telstra-TIO arbitrations.

Further to my telephone conversation with you on Saturday, 1 August 1998, I am confirming in writing what I was told by Dr Hughes in the early part of 1994, in response to an alleged missing facsimite.

During the period between late January and mid-April 1994, I had reason to have direct discussion with Dr thighes on the contents of correspondence sent to thim re the proposed Telstra-TIO arbitration.

On one occasion during this period, I rang Dr Hughes before 9:00AM on his direct telephone number to discuss contents of facsimile I had just sent to him. The facsimite had not been received at Hunt \& Hunt, Melbourne's Office.

Dr Hughes, after making inquiries, informed me, expressed in words to the effect, the following:-

- Hunt \& Hunt Austraiian Head Office was located in Sydney.
- Hunt \& Hunt Australia is a member of an international association of law firms.
- Due to overseas time zone differences, at close of business. Hunt \& Hunt Melbourne's incoming facsimiles are night switched to automatically divert to Hunt \& Hunt Sydney office, where someone is always on duty.
- There are occasions on the opening of the Melbourne office, the person responsible for canceling the night switching of incoming faxes from the Melbourne Office to the Sydney Office, has failed to cancet the automatic diversion of incoming facsimiles.
- The diversion of incoming faxes to Hunt \& Hunt Melbourne to Sydney Head Office has also been taking place when the Metbourne fax machine has been out of paper or when all of the incoming fax lines are busy.
- It is the duty of Hunt \& Hunt Sydney Office to redistribute received facsimiles to theintended State Offices it had received after hours and before commencement of the next day of business.
- The onforwarding of after hours facsimiles transmitted to State Offices received at the Sydney Office is not taking place.
- Thank you for drawing this matter to my attention, as the Management of incoming facsimiles to Hunt \& Hunt Melbourne are not satisfactory.
- New procedures will be introduced to rectify this deficiency.

I have read all of your correspondence regarding missing facsimiles, interception of facsimiles and telephone calls. I have examined all of the documents attached to your correspondence. which in my opinion, support many of your assertions.

Alan, what you have managed to piece together by examining your telephone account, in conjunction with other people's telephone accounts, together with Telstra documents received under FOI and/or arbitration, is alarming. I believe you have produced a picture that demonstrates your telephone service has been illegally interfered with, before, during and after your arbitration.

I note you have allowed your findings to remain open when there is insufficient independent evidence to support what appears to be apparent.

I believe the incident that I experienced and explanation I received from Dr thughes could be a reason and explanation why Dr Hughes did not receive all facsimiles sent to him.

What I experienced does not identify all of the reasons Teistra received 43 submissions less than what you sent to Dr Hughes.

In closing, I draw your attention to the testing performed by Teistra on yours and my facsimile machines in late 1993, as a result of our complaints about my office receiving blank pieces of paper, with the furny symbol on the top when you were faxing documents to me. As you will remember, Telstra, on completion of the tests, asserted there was nothing wrong with the telephone lines nor our facsimile machines.

Should you require further information, please do not hesitate to make contact.

OATHS ACT 2001

STATUTORY DECLARATION
I, Graham Schorer of 493 Queensberry Street, North Melbourne,
do solemnly and sincerely declare on oath that my letter dated 4 August 1998 to Alan Smith of Cape Bridgewater Holiday Camp, Portland, Victoria 3305 and my correspondence dated 30 July 2009 to Mr Crowley, Chief Executive Officer, Institute of Arbitrators and Mediators of Australia are both a factual account of events that have taken place.

I make this solemn declaration under the Oaths Act 2001.

Declared at $\qquad$ North Melbourne.

Fibre Degradation
Thursday, 16 September, 1993 3:41PM
High

You will recall a week or so ago I briefly mentioned that Network Products had experienced difficulties with parts of the optical fibre network and that Gerry Moriarty \& Harvey Sabine (GM - Transmission) had asked that I and suitable external litigation experts consider Telecom's legal position.

My initial preference for external legal support was Russell Benny \& Wayne Condor. Because one of the possible defendant's (Olex Cables) is a division of Pacific Dunlop Ltd, Freehill Hollingdale \& Page had a conflict of interest. Due to the firm's commercial litigation expertise and the knowledge it has acquired of Telecom's supply processes through the Switch Vendor Study, my other preference was Molomby \& Molomby. Lindsay Collins \& Nick Nichola were available, Molomby's had no conflict of interest, so I have briefed Molomby \& Molomby.

Problems were experienced in the MacKay to Rockhampton leg of the optical fibre network in December '93. Similar problems were found in the Katherine to Tenant Creek part of the network in April this year. The probable cause of the problem was only identified in late July, early August. In Telecon's opinion the problem is due to an aculeate coating (CPC3) used on optical fibre supplied by Corning thc (US). Optical fibre cable is supposed to have a 40 year working life. If the MacKay \& Katherine experience are repeated elsewhere in the network, in the northern part of Australia, the network is akely to develop attenuation problems within 2 or 3 years of installation. The network will have major COS problems whilst the CPC3 delaminates from the optic fibre. There are no firm estimates on how long this may take.

Telecom's sources its optical fibre cable from 3 suppliers, Pirelli Cables Aust Ltd, Olex Cables and MM Cables. These 3 suppliers obtain their optical fibre from Optical Waveguides Australia (OWA) [using Corning technology] and Optix [using Sumitomo technology]. To date Telecom has not experienced any problems with cable that uses Sumitomo technology. From October the cable suppliers will only provide Sumitomo sourced cable. Existing stocks of Corning cable will be used in th low risk / low volume areas.

Legal involvement at this stage is part of NWP's risk management exercise. It is cleanly understood that any decision to pursue legal options will require senior management endorsement.

The following chronology can be supported by documentation which I have on five.

## PHONE FAR PROBLEMS

.1. I purchased the Cape Bridgewater Holiday Camp (now Cape Bridgewater Coastal Camp) December $\mathbf{Z 0 0 1}$.
2. Whin a week or so of taking over the business from Alan Smith, friends and new clients were stating they could not get through to us on successfully on the phone.
3. By mid 2002, my wife Jenny and ! realised we were having major problems with incoming calls and our outgoing faxes were a major problem.
4. From discussions with the previous owners jenny and I now fully understood reporting for some time.
3. Letters from us to our focal Federal Alember of Parliament, the Hon David Hawker, Speaker in the House of Representatives, led to Telstra visiting our business to investigate these continuing problems.
6. In November 2002, after Telsira realised there was in fact a Teistra related problem and not (customer related equipment) they informed us that the new wiring they were instailing was worth thousands of dollars but not to worry as Telstra would pick-up the cost.
7. After Teistra rewired the business including disconnecting a Telstra installed faulty phone alarm bell, we were informed Telstra had found other problems and believed who ever had installed the wiring had done an unprofessional job.
8. Internal Teistra documentation provided to me by Allan Smith confirmed Teistra thernseives had done the wiring.
3. Jenny and ! noticed that aithough our incoming-call rate had more than doubled once this rewiring had taken place Talstra was still unable to provide a satisfactory reason as to why we were still having problems.
40. Telstra connected fault finding equipment called Customer Access Call Analysis (CCAS) to 55-267267 business line.
14. This CCAS data recorded numerous faiths that could not be explained by the (Level Three) Telstre fault managers. Hand written notations on some of these CCAS data sheets, confirm even the Thetstra technicians themselves
12. By 2004 , with the ongoing problems.

By 2004, with the probietne not resolved ! again sought help through the Hon
David hawker.
13. Correspondence from Ar Hawker in August 2004, confirms Telstre had advised him that the local un-mamed exchange was soon to be upgraded
14. From 2004 until most recently still no upgrades.
15. In August this year we contacted Air upgrades.
problems and advised his staff we have nor's office regarding the ongoing business. faults being experienced we changed back to Telstra.
17. From Tuesday to Thursday evening (August 2006). Telstra technicians were present at the hoidiay Camp and surrounding area attempting to locate and fix the problems they had experienced themselves.
18. During this three day period even Telstra's own technicians coulon't understand why their own la ut testing equipment was malfunctioning.
19. Teistra informed us we had what is commonly known in technical words as (a line in line lock-up rendering our business phone useless until the fault is fixed.

The technicians then in hook up constitution with outside office guru's did a fault graph reading on our 55267267 line with the outcome that their office technical staff stated words to the affect the reading was impossible (couldn't be correct). it was then that the local technician became quite annoyed when the technical guru insinuated that the equipment the local tech was using must be faulty. The local tech then informed the technical guru that there was nothing wrong with the equipment at all.

It was then that the focal technician informed me that as strange as it might seem the believed that because our business was on optical fibre and was so close to the Beach Kiosk (junction box) this could very well be part of the problem. Apparently either under powering over powering was also an issue He realised that after testing all the other optical fibre out tets with his testing equipment and still reached this impossible reading (according to the technical guru), he would have to move us off the fibre.
it was on this note that the techniciar, informed me that although it was a back ward step he was going to investigate the possibility of moving the business off the optical fibre and back on to the 'old copper wiring'.

After investigating this possibility our business was then moved back onto the 'old copper wiring'. The above is more evidence of the continuation of the phone and fax problems my wife and 4 inherited when we purchased our business.

AND I make this solemn declaration conscientiously believing the same to be true and by virite of the provisions of an Act of the Pariamem of Victoria rendering persons making a false declaration for wilful and comment poring: DECLARED at Fex-m...... in the

State of Victoria this

## Dear Darren,

I have recently heard that you are now blaming your current financial problems on the poor condition of the Holiday Camp when you purchased it, including the lack of improvements I had been directed to carry out by the local health authorities. I find these allegations most disturbing and would like to remind you of a number of points you may have forgotten.

## ACCREDITATION 2000/2001

Before the Camp was put on the market, I complied with all the requirements of the Camping Association of Victoria (CAV) and so achieved their accreditation. Because the CAV has such high standards, the Victorian Government Tourism Association considers them to offer a benchmark standard for other tourism bodies to work towards.

In order to become accredited (either with the CAV or any other tourism body) a business is required to have the following written permits in place:

1. Permit of appliance and recognised standards from the Local Council Health Department:

The only changes the Council required after their inspection were the installation of a hands-free washbasin in the main kitchen, and installation of ducting and a canopy over the chip fryer. The hands-free basin was the only outstanding item not in place when you purchased the business.
2. Building surveyor's guarantee of appliance and safety standards.
3. Local Fire Authority approval, stating that all the required standards have been met.
4. Plumbing certificates of appliance, including dates of when new septic tanks were installed.
5. Recognised standard appliance document from a certified electrical contractor.
6. Insurance documentation, including notification of any possibly dangerous locations on the property:

Gas bottles on the property were the only dangerous areas identified during our insurance inspection and these were accordingly enclosed in cages before the business was put on the market.

During the CAV accreditation process Cathy and I visited a number of similar Holiday Camps around Victoria and attended seminars on the subject to ensure that we were fully aware of all the official requirements of us, as Camp operators. The accreditation team, who had assessed some one hundred and sixty eight other similar businesses before ours, and who were also aware of the telephone problems we had been forced to deal with, were most impressed with our Camp, noting that they had never before found a similar facility able to boast that five separate schools had returned annually over a thirteen year period, and two others had returned annually for eight years. As far as I know, these schools are still returning to your business.

## FINANCIAL AGREEMENT

As you knew before you bought the business, the gross income from the Camp during the last full financial year before I sold (2000/2001) was approximately $\$ 150,000$, even without the improvements you have made over the last two years, including new paths and barbeque, new kitchen equipment, new flooring in the church building, new plumbing in the toilets and refacing the main hall.

Before you began these changes I allowed you a two-month cooling-off period, from December 2001 to February 2002, but you chose to go ahead with the purchase, even though you could have taken the profit earned over this time had you decided not to go ahead. Since your first payment, you have not paid even one six-monthly payment on time, as the attached lists shows, and you have not reimbursed me at all for the cost of power to pump water to your business, even though I am sure Coastal Real Estate will confirm that you originally agreed to either install a meter or pay an agreed electricity cost for the pumping process.

## TELSTRA PROBLEMS

Many legal people and Senators plus the Australian Federal Police, David Hawker and the Board of Telstra all now know that Telstra relied on false documentation and false test results to support their defence of my arbitration claims. Because I believed these documents and therefore accepted Telstra's insistence that all the phone problems had been fixed, I accepted compensation from Telstra and, when I found the problems were not fixed at all, and continued to pressure Telstra to repair the damage, 1 believed Telstra then resorted to delaying tactics in retribution. This belief was a major factor in my decision to sell the business, because I believed Telstra would then have no reason to continue ignoring the phone problems. I truly believed that, once you took over, Telstra would immediately respond to your complaints and fix the phone problems for you. As we all now know, the phone problems were genuine and had not been 'manufactured' by Telstra to punish me.

## VALUATION

Because the phone problems continued after you took over, Cathy and I have given you and Jenny every conceivable allowance so you would have a proper chance to build the business once the phones had been brought up to reasonable standard. Although the Camp was valued at $\$ 800,000$ to $\$ 830,000$ only three months before you purchased it, I sold it to you for $\$ 650,000$ and since it has now been valued at $\$ 1.2$ million it was clearly a business with a sound basis when you purchased it.

At this point however I must also add that I totally understand the psychological stresses associated with the phone problems you have had to deal with, having suffered under the same conditions myself for years. I know from my experience how badly the stress affected my judgement (and I expect it had a similar effect on you too), I tried to hide the effects of that stress from everyone around me and how difficult it was to make decisions.

I also understand the thrill of taking over a new business (having done the same thing myself in 1988) and how difficult it can be to keep control of finances at the start. Please do remember, however, that there are others who have been through what you have been through, and some of us have offered you as much assistance as we can.

After we have finished the new financial arrangements now being worked out with the help of Howman Blaker Harris Legal and this process is in place there will be no allowance for any late payments as has been afforded you in the past. I am sure most will agree that Cathy and I have been more than reasonable over the past 30 months in allowing you to catch up on meeting your financial commitments.

Best regards,

Alan Smith

## RE: COT CASES

On today's date I spoke to Mr. Goldberg who after lengthy discussion with me indicated his inability to take on the main task.

He suggested Dr. Clifford L. Pannan.

On a date to be determined (last week or the week before) spending from 9.30 to 3.30 at the pre-conference with Dr. Gordon Hughes and Bartlett of Minter Ellison etc. etc.
Later attending Mrs. Ghams, loss assessor at night. perusing all the documentation on the previous day.
Various telephone attendances on Mr. Schorer on the previous
day. day.

Dear Graham
Fast Track Settlement Procedure

You have suggested that it is your understanding that Telecoms will
pay the costs of preparation and submission of your claim. My recollections and my file do not accord with your recollections.

1. The Fast Track Settlement Proposal does not provide for the recovery of the costs of preparing the claim. It does provide (clause $2(k)$ ) for Telecoms paying the assessors costs however.
2. The Fast Track Arbitration Procedure does not provide for recovery of such costs.
3. On 28 March 1994 Ann Garms advised me that she was not happy that she would need to bear her own costs of the submission.
4. On 28 March Amanda Davis said that she would like solicitor/ client costs.
5. I understand that Steve Black and Warwick Smith discussed and agreed on 29 March 1994 , that the claimants would fund the preparation of their claims, and Telecoms would fund the administrative costs, including that of the Arbitrator, the Resource Unit and the TIO's costs.
6. On 29 March Warwick Smith sent me a letter which included the following:

SYDNEY

## (02) 2104444

BRISBANE (07) 2266333

CANBERRA (06) 2487533

## HONG KONG

 $+8528469100$LONDON +44718317871

> 'As to costs, the arrangement is that the administrative costs of the procedure such as TIO, Legal Counsel, Assessor and Resource Unit are covered by Telecom. Some initial conference costs at my request were also covered. Per the agreement and the procedure costs for cot claimants of their submissions are their responsibility.'
7. Bernard Ponting \& Co, in their letter to Mrs Garms of 28 March 1994, noted that the costs of preparation would fall on Mrs Garms (paragraph 1). He added that if there was a need for Mrs Garms to travel to Melbourne, she would also need to bear the cost of that travel.

In this regard he referred to clause 22 of the draft Procedure.
8. I discussed this on 29 March 1994 in the context of it being possible to ask the Arbitrator to have any oral hearings in Brisbane, to reduce the costs to the claimants. There was no discussion that such costs would be recoverable from Telecom.
9. Mr Ponting's letter of 31 March (paragraph 9) expressed a wish that Telecom should bear the claimant's costs throughout, rather than each party bearing its own costs, as he acknowledged was provided in clause 22 of the Fast Track Arbitration Procedure. However, no subsequent amendment was made to clause 22.
10. Amanda Davis executed the Procedure with no amendment to clause 22.
11. In the discussions leading up to the signing by the other COT, clause 22 was not amended.
12. Graham Schorer told me on 13 April that he believed that 'losses. include the time etc in preparing the case and organising the media campaign. He felt that such costs should be part of the award. He said that Robin Davey agreed with this.

I noted that the draft Procedure did not recognise that such costs form part of the claim.
13. Graham repeated these comments on 15 April.
14. Warwick Smith told me on 15 April that he had spoken with Robin Davey and Robin Davey felt that clause 22 on costs accurately reflected the agreement. Davey said that the costs of preparation did not form part of the loss.
15. I also spoke directly to Robin Davey on 15 April and he said that the Proposal did not envisage Telecom paying the costs of the preparation.
16. All issues were discussed at a meeting on 20 April, at which Robin Davey was also present.
17. Clause 22 of the Procedure, signed by Messes Garms, Smith and Schorer on 21 April 1994, provides that each party, shall bear their own costs of the arbitration.

If you have any queries please let me know.
Yours sincerely

Peter Bartlett

## Dear Dr Hughes

## JAPANESE SPARE PARTS - ARBITRATION - TRLECOM AUSTRALIA

The documents recently provided by Telstre contain mew and relevant information which clearly has an impact on the Claimants' position.

That information includes, from Teletra's own records, that Loop Mux problems were recognised as carly as 1986 and persisted through at least 1992, and were not confined to the period October 1989- late 1990 ms accepted by the Resource Unit.

Further, there is evidence that the report on the PCM Multiplex cr faults was written to a predetermined outcome.

There are also documents which provide information contrary to that contained in the Statutory Declarations provided by Telstra as part of their defence.

The documents give rise to certain questions which, we believe, ought to bo put to Telstra on the matter of records referred to in the documentation recently provided.

In view of this, I request the following:

1. That a period of three weeks from today be allowed for the preparation of a further submission. (This period includes Easter).
2. That arrangements be made for the Resource unit to look at these documents. I would be happy to give them the appropriate document references.

Yours sincerely

27 June 1996
The Hon Daryl Williams AM, QC, MP
Attorney General and Minister for Justice
Parliament House
CANBERRA ACT
Dear Minister,
Re: Defective Administration and unlawful corporate conduct by TELSTRA Corporation. - "TELSTRA senior technical officers have made statements under oath which are known to them to be untrue"

I wish to submit a formal complaint concerning Defective Administration and unlawful conduct by TELSTRA Corporation. I am in Arbitration with TELSTRA. The Asbitration is known as the "Fast Track Arbitration Procedure."

The Arbitration was negotiated by AUSTEL, on behalf of four small business customers of whom I am one. We are commonly referred to as the CoT Cases "Casualties of TELSTRA."

The Rules of the FTAP "Arbitration Proceedings" stipulate that "the arbitration will be on documents and written submissions only" In TELSTRA's Defence TELSTRA Corporation submitted as "evidence" Statutory Declarations by TELSTRA personnel. In these Statutory Declarations TELSTRA senior technical officers have made statements under oath which are known to them to be untrue.

I am informed that it is a crime under the Crimes Act of 1914 to provide false testimony under oath. The unlawful conduct adopted by TELSTRA Corporation has severely disadvantaged us in the arbitration process.

TELSTRA is reliant upon the Statutory Declarations as evidence because TELSTRA states that the majority of historic documents which they base their Defence on have either disappeared or have been destroyed. It is therefore absolutely crucial to the process of Natural Justice that TELSTRA's Statutory Declarations be incontestable.

Subsequent to my complaint concerning the validity of TELSTRA's Defence to the Arbitrator, Mr Ted Benjamin - National Manager Customer Response Unit TELSTRA wrote on the 9 June, 1995:

# Formal Complaint to the Hon Daryl Willians <br> RE: Defective Administration - Unlawful Conduct 

"The BOOI Report is itself not evidence (hearsay or otherwise). The question of admissibility of the Report would therefore not seem to arise"......

> "Telecom has provided the evidence upon which the BOOI Report was based separately in the various appendices and Statutory Declarations."

I am in possession of documents which validate my assertions that the testimony sworn was known to the declarant to be untrue. Accompanying this complaint I enclose the Statutory Declarations of GEORGE SZYLKARSKI, LESLIE CHAMBERLAIN - 1989-1991 Area Manager (North) for Telecom Business Services ("TBS"). 1991- Telecom Manager, Network Operations, and PAUL HOWARD MIDDLEDITCH together with copies of the documentary evidence which disproves the sworn declarations. I will forward the Attachments with the bound copy of this complaint.

I will provide you with additional submissions next week on other statements submitted by TELSTRA Officers under oath and which were known to the declarants to be untrue.

There is now conclusive documentary evidence that TELSTRA misled AUSTEL, Bell Canada International and Coopers and Lybrand during their Inquiries. The subsequent "Reports" published by the above are in the most important areas incorrect and therefore defamatory and have caused damage to our credibility. I will today be lodging a formal complaint with AUSTEL in this regard.

The Commonwealth Ombudsman Ms Phillipa Smith has just completed an inquiry into my complaint concerning the conduct of TELSTRA in the provision of documents under FOI including the withholding and alleged destruction of documents by TELSTRA. "TELSTRA \& FOI - Report of an investigation into a complaint by Mrs Ann Garms May 1996 - Report under section 35A of the Ombudsman Act 1976."

I will forward a copy of the Commonwealth Ombudsmans Report with the original of this complaint.

I would appreciate your advice as a matter of urgency as to what action you will be taking in this matter. Your officer asked me if I had lodged a complaint with the Australian Federal Police? Could you please advise me whether I or your office should lodge the complaint.

I would appreciate an acknowledgment of receipt of this complaint.

Yours sincerely

Ann Garms

Dear Mr Smith
"Fast Track" Asbitration Procedure

I refer to your recent corzespondence with lan Campbell concerning the procedures and timing to apply to the "Fast Track" dispute reviews.

Originally, there was attached to the "Fast Track" agreement a set of demiled draft rules which were being developed for general ure in relation to the arbitration of telephone-related diaputes. Those draft "standiard" rules are referred to in ctause I (b) of the "Fast Track" agreements. The "spandard" rules are still being tinalised, bur they are now rebutively cjose to tinadisation.
"elecom has modified u copy of the current draft "sundard" rules so as to be xpecifically xuitable for use in relation to the arbicration of the "Fast Track" disputes. The inuditications tuke into ascount the following:

- the provisions of the "Fast Track" agreements.
- some relevant comments which Austel has recently made conceming the draft "standard" nuies. and
- our further views on the rules which should apply to these cases.

A copy of those modified rutes is enclosed for your considerution for use in relation to the arbitration of the "Fast Track" disputes.

You no doubt appreciate thut there is a need for such rules and procedures to be set before any "Fast Track" review is commenced. That is because the "Fast Truck" agrecments signed by Mr Schorcr. Mrs Gurms. Mrs Cillan and Mr Smith. only convitute agreernents to enter into an arbitration process. As wuih. they do not fully document the rules and procedures to be applied to that arbittation provers.

In the absense of agreed rules and procedures, the following problems could srive:

- the reviews could be seen to be unfair if rules or procedures are applied without prior agreemenc
- the reviews could be constantly delayed if agreement is sought to set rules or procedures purt way through a review; and/or
- the reviews could fail to achieve resolutions which are legilly binding if sules which have not been agreed to. are applied.

It is importank that the process to agrice and adopt a set of rules and procedures be implemented quickly in the light of your planned tirnetable for the review of the "Fast-Track" disputes. Please be assured that Telecom will provide every assistance in this regurd.

I would appreciare being kept informed of any decision made conceming any rules and procedures to be adopted for these reviews.

Yours faithfully

Steve Black
GROUP GENERAL MANAGER CUSTOMER AFFAIRS

Mr Warwick Smith<br>Telecommunications industry Ombudsman<br>Ground Fioor<br>321 Exhibition Street<br>MELBOURNE VIC 3000

## Dear Warwick,

I have attached for your information a copy of a letter sent to AUSTEL providing the results of two additional studies undertaken by Telecom to test the Rotary Hunting Groups and to provide supplementary inter-exchange network tests and the details of the tests. The additional testing was undertaken to provide further information on the reliability of the telecommunications services provided to those customers complaining of difficult network faults.

As you will see from the attached letter, the documents are rated "Commercial in Confidence" and are provided for the information of the TIO and not for release or disclosure to third parties without the permission of Telecom Australia. I would ask that this rating of the documents be respected.

It is anticipated that the release of these documents to the four customers currently proposed for the fast track arbitration process will be agreed at an appropriate time in consultation with yourself. The linning of the release can be finalised once the assessor has been appointed and the procedures for the arbitration have been agreed.

1 also wish to confirm to you my previous advice regarding arrangements made with AUSTEL for the release of documents obtained from Telecom to the four customers currently proposed for the Fast Track arbitration process.
It was agreed at a meeting between Mr. Graeme Ward and Mr. Steve Black of Telecom and Dr Bob Horton and Mr Neil Tuckwell of AUSTEL on 7 January 1994 that:

- Information obtained from Telecom, in the course of AUSTEL's regulatory functions, and relevant to any parties involved in a formal arbitration process with Telecom under the control of the
- Telecommunications Industry Ombudshan (TIO) will only be released after consultation with the TIO and Telecom.
- The AUSTEL draft ieport will be expedited to ensure that it is available at an earty stage of the arbitration process.
- The AUSTEL. draft report will be released to the parties involved in the fast track arbitration process for comment in accordance with a process agreed with the TIO. and only after each party has signed a formal document committing to keeping the contents of the report confidential and giving an undertaking not to comment either privately or publicly on the report until after it has been released publicly by AUSTEL

Yours sincerely,

$\$$

MELBOURNE VC 3004

Dear Mr MacMahon,

I refer to your letter of 31 December 1893 regarding COT cases. I hive abready responded to paragraphs two to five of that letter. This letter dealis solely with the status of Telecom's response to the C\&L and Bel Canada reports.

In accordance with our agreement reached in the meeling with yourself and your Chairman, these documents will be released through the 710 at the appropriate stage of the arbitration process.

It is my view that the appropriate time for release is after the assessor is appointed and the procedural rules for the arbitration process have been agreed by all parties.

However, as indicated in our agreement, this decision will be taken in consulkation with the TiO.

Yours sincarely,

File: VSC/42

## Attention

## Simon,

I feel obliged to voice concerns I have regarding the information being provided regarding the investigations of Cape Bridgewater Holiday Camp and Golden Messengers courier service.

Much of the information provided contains A party number details which should under no circumstances be made available to the recipients of these files. We have been instructed that we cannot remove this information ourselves so the responsibility of ensuring that this private information is not inadvertently included rests with you.

I also have some concern that the working notes that have been included may.be mis construed if taken out of context. There is a great quantity of technical information cantained therein, some of it relates to testing procedures and equipment recently developed and therefore little understood by those outside our company. If there is anything within the files provide that raises questions in your mind, please feel free to contact me and I will endeavour to help you in anyway I can.

Please call me if I can help in anyway.

Regards,
David Stockdale.
PITO1 - National Network Investigations, Melbourne.

R11698

When I have formulated my views as to the appropriate procecture for conducing the tasessment, I intend to meet formally whit a sepresentabive of Telecom and a alngle representative of the four nominsted COT Cases in onder to Analise acrangements.

In the meandme I shall meet as socn as poosible with Mr Rundell and Mr Blaha to discuss the roles of their respective organisations.

I consider ti to be inappropriate for me to discuss the merits of the four actions with any involved party except in accordance with the agreed assesment procedure. I nevertheless wish to remala as scocsolibie to the parties as posalble. It may be necemary for a party to consact me personally from time to time for reasons uncomnected with the mertas of the actions. In such circumstances, I nevertheless reterve the right to provide any other party with a memorandum regarding the cantact and the issues diacussed.

At this stuge I have no information at all regarding any of the ciatma. While the assessinent procedure will of courre provide for the formal presentation of material, it may be useful if the partes could informally provide me with any matedal which chey joinity agree might be of asalstince to me and the project team by way of background.

Yours sincerely

CC. $\$$ Bleck J Rundall

C/94/195.C/94/225:JW
Mr JR Holmes
Corporate Secretary
Telstra Corporation Ld d.
38th Floor, 242 Exhibition Street
MELBOURNE: VIC 3000
Wear Mr Holmes
I received complaints from three of the 'COT Cases', Mr Graham Schorer, Mr Alan Smith and Ms Ann Gems, concerning TELECOMs handling of their applications under the Freedom of Information Act (FOI Act) of 24 November 1993 and 21 December 1993 respectively.

I have summarised Mr Smith's complaint as alleging that TELECOM unreasonably has decided to apply charges to his FOI request and that the charges will be considerable.

Mr Schorer's complaint is that TEIECOM unreasonably refused to remit the application fee and is proposing to impose processing charges.

Ms Garms also has complained that TELECOM unreasonably is imposing charges.
All three assert that they require the information to support their submissions to the imminent review in accordance with the Fast Track Settlement Proposal (FTSP) agreed

I understand that the FTSP provides a basis for a Proposed Arbitration Procedure that may be applied as a dispute resolution process additional to the Telecommunications Industry Ombudsman scheme. I also understand that TELECOM acknowledges that the COT Cases proposal has assisted TELECOM to clarify its views about dispute resolution processes suitable for small business in the future.

Clearly it is important that the FTSP be given every opportunity to achieve its objectives. As clause 2(e) stipulates that the review will be primarily based on documents and written submissions and that each party will have access to the other party's submissions and have the opportunity to respond. TELECOM should facilitate access by the parties to relevant information. Furthermore, it is important that TELECOM be seen to be co-operating as far as is reasonable.

In the circumstupose, the giving of accesss to information required by the applicants to presenir ther coses to the essossor apporated under the FTSP is in the general public my view that TELECOM stould waive payment of the spplication fees in respect of the FOI applications. Also, TEIECOM should waive chax part of the charges which relates to the information requested which is required to enable the applicants to present their cases under che FTSP.

I should also draw your atrention to section 14 of the FOI Act which-states: Noching in this Act is intended to prevent or discourage Ministers and agencies from publishing or giving access to documents (including exempt documents). otherwise than as required by this Act, where they can properly do so or are required by law to do so.

In view of the importence of the FTSP, I think that TEI ECOM should release to the applicants ill of the mindatiation required by themin connection with preseditition of theirciseses to the essessor, ounside the provisions of fhe FOl Act TELECOM could invite the applicancis so malce an application under the For Act if they require further information which TELECOM is not prepared to release without considering an epplication under the FOI Act Should you decice to withhold some documents, it Would be helpful to the applicants if you would describe them so that hey may make an informed judgement is to whether to pursue accesss chrough the FOI Act.
I should be grateful for your early comments on my views.
Should your officers wish to discuss any of the foregoing they could contact John Wyanck on 062760153.

Yours sincerely

Philippa Smith
Commonwealth Ombudsman.

The attached request is referred for your action. The author of the request, Simon Chalmers, is from Prechill Hollingdale \& Page, Telecoms's solicitors. I suggest that you action this request not just for the two customers mentioned but also for Mr G Schorer and Mr A. Smith. Information that has previously been sent to the Viewing Room will be recessed from there. It is important to note that material that is not produced for this request cannot be used in Telecoms's defence.

Dr G Hughes Hunt \& Hunt Solicitors 21st floor

BY COURIER 459 Collins Street MRLBOURNE 3000

## Dear Gordon

## COI matters

Following mitizeeting on Thursday last, I now enclose revised Procedure for your consideration.

I make the following comments upon it:-

1. The underlying aim of the procedure is for it to be workable

 into.
2. Huthumsiathether or not the Procedure should come within the ambit of the Victorian Commercial Arbitration Act 1984. Mont efleioithat it should. Relevant considerations were that under the Commercial Arbitration Act:
\% You are entitled to administer oaths and affirmations (\$19 (2)) $\%$.
subpoenaes can be issued to compel the production of documents (\$17):
if a party or witness fails to comply with your directions, application can be made to the Suprame rovrt (S18).

Further considerations are:
some of the procedures adopted are somewhat novel in the arbitration context e.g. the use to be made of the Resource Unit. However, armitration procedures are ginant $/$ to be flexible and, provided the parties agree, as they will have by signing the Request for Arbitration, this does not concern me;
under Section 38 of the Commercial Arbitration Act, with the leave of the Court, there is the fight to appeal on a question of law arising out of an award. This right of appeal ganybeyexcluded under Section 40 by having the parties enter into an "exclusion agreement". Such an exclusion agreement can only be entered into after the arbitration proceedings have "commenced" (Section 40 (6)). Pursuant to Section 3 (5) the arbitration is deemed to have "commenced" once the Request for Arbitration has been signed by both parties. The possibility of having an exclusion agreement could be discussed at your initial meeting with the parties;
it is provided in clause 6 that legal representation is to be at your discretion. This is in line with clause 2 (e) of the Fantwirack* *agreement. Section 20 however states the circumstances in which an arbitrator is required to grant legal representation. This regime cannot be amended by the agreement of the parties. In practice, the issue of legal representation will only arise if you require oral submissions and even then there is to be no cross-examination. I would not anticipate the issue of legal representation being of great moment.
On balance, it was decided that it would be preferable to have the Procedure operating under the Comercial Arbitration Act.,
3. You will note that $I$ have amended the Procedure so that it is clear that you are conducting four separate arbitrations and will hand down four separate awards although you may combine some aspects of the four hearings. I have also provided that all four claimants must agree to the Procedure before there is a binding arbitration agreement with respect to any of them. I would be interested in your thoughts upon this.
4. As you would be aware, Section 14 of the Commercial Arbitration Act allows you, subject to the Act and to the Procedure, to conduct the proceedings in such manner as you see fit. This gives you a high degree of tlexibility However otherwise, the Procedure must be conducted in accordance with the rules of natural justice.
5. I will be interested in your thoughts on Clause 8 which relates to the Resource Unit. I thought it best to define the Resource Unit in fairly general terma.
6. In paragraph 1 on page 8, you will note that $I$ have provided for any loss suffered by Telecom as a result of breach of the confidentiality provisions to be determined by arbitration in
accordance with Section 22 (2)
 Following our discussion, I thought this might be a workable manner of dealing with this difficult situation.
7. Once you are happy with the suggested Procedure, I suggest you convene a preliminary conference with the parties to discuss the Procedure and also to discuss the possibility of exclusion agreements. At this conference you could also inform the parties that you will be informing AusTEL in accordance with Clause 2 (h) of the "Fast Track" Agreement.

I look forward to discussing the suggested Procedure with you after you have considered it.

enclosure

407

I am enclosing my proposal as to the "fast-track" arbitration procedure.
This procedure has been devised in consultation with Messrs Minter Ellison Monis Fletcher, solicitors for the relecommunications Industry
Pmbudsman The proposed procedure is acceppable to the Ombudsman and members of the Resource Unit.

1 would be grateful if you would let me have your comments on the proposal as soon as possible. 1 am prepared to discuss the proposal individually with either of the parties. I am also prepared to convene a meeting involving both parties at short notice, if requested, in order to resolve any outstanding issues regarding the proposed procedure.

Yours sincerely

P.O. BOX 343 NORTH MELBOURNE 3051

Dear Mr. Hunt,

I am forwarding to you by courier, the documentation I have received from Dr. Gordon Hughes.
As a matter of urgency, could you please read this document so that you are in a position to have further discussions or be in a position to advise me.

Subject to any strong advice you may give me, I personally am rejecting the document in total, as this is not an arbitration procedure and I do not intend to be part of an arbitration procedure and I am also informed that the other C.O.T. Case Members do not intend and never agreed to be involved in an arbitration procedure.

We were informed by Austel that this assessment process called the Fast Track Settlement Proposal we were agreeing to did not have to comply orbe bound by the strict rules contained in an arbitration process.

We were all advised by Austel that we were entering into an assessment process which was vastly different to an arbitration procedure.

I await your considered response.

Regards,

encs (18)

Derr

Now that we have ssttibd the appointments of ascessor and resource mit and following the very intemse discassions and communicasions about this matter with ma, it is my view that the future dealings with my office should be on the foilowing basis for all purties.

- Whilst I am bappy to be accessible and amenable po facilitating in whatever way possible the "Fast Track" process, the recent involvement of the Commonwealth Ombudsman has indicated to me, that a far more regimented regime of contact with the relevant parties from my point of view is going to be neceussary. The only contrect point in ray office is Jenny Wrechuma my executive assistant,
- I will not encertain phone calls about substantive mutters from any perty.
- I would be happy to meet in conference at may coavenient time, bua would requine to be preseat my executive assistrat for note taking or ay legal advisen, Mr. Bartien.
- I will not cake calls which are requiring of me to make inurediate judgmonts about substantive matters and the expectation for me to do so should not be preseat in the minds of those making the calls.

The process should be given every opportunity to work and as we have . . rorked hard to establish the cavironment for this to take place, I hope the oppornunity to proceed forward will contimue.

Dear John

## COT MATTERS

I refer to our conference on 11 February and confirm I am agreeable in principle to the following amendments to. the draft "Fast-Track" Arbitration Procedure.

## Clause 6

## insert a third dor point:

- "Such member or members of the Resource Unit (as defined in clause 8.1) as the Arbitrator deems appropriate".

## Clams 7.5

Add the following sentence:
-The Arbitrator may stipulate such time frame and such other conditions in respect of the production of documentary information pursuant to this clause as he reasonably considers to be appropriate."

Clause 7.6
Add the words "or sub-clause $7.5^{\prime \prime}$ in the second tine after the words "subclause $7.1^{\circ}$.

111974_cinfus

## Clause 7.7

Add the words "or sub-clause $7.5^{\circ}$ after the words "clause 7.2 in the third line.

## Clause 81

Insert the words "(or related entity)" in the third line after the words "Chartered Accountants" and again in the fifth line afiee the words "South. Melbourne".

Clause 82

## Replace the second sentence with the following:

The Arbitator shal notify the parties in advance of any such proposed activides, stpulating itime frame within which either party may make a submission, verbal or writien, in felation to the nature of the proposed enquiries or research. The Arbitrator may at his discretion seck submissions from the parties in relation to. findings of fact arising out of such enguiries or research."

I am saill not completely relaxed about this clause. I would not be surprised if one of the parties objects to the ability of the Resource Undt to exumine material which has nox been formally placed in evidence. On the other hand, I can see no alternative way of approaching the problem in a logistically sensible fashion.

Clause 2 e
Delete the words "Subject to sub-clause 8.2,".

## Clause 10.2 .2

I do not think this clause requires change. In essence, it states that in the process of deternining a ciaimant's losses, I ama to establish a link between the loss chamed and the alleged defect and, to assist in this process, I can make reasonable inferences not only from the evidence as focmaly presented but also from addtional information provided to me by the Resource Unit. The wording may be curnbersome but I believe it achiever its purpose.

Clanse 20
The existing clause 20 should become clause 20.1. A clause 20.2 should be added as follows:

The fees and expenses of individual members of the Resounce Unit shall be paid by the Administrator and are part of the administrative costs of the Procedure."

## Clause 21

The heading should simply read "Liability".
The exising clause 24 should become chause 24.1 and a clause 24.2 should be inserted as follows:

The individual members of the Resource Unit thall not be liable to any party for any act or omission in connection with any encquiry or research or assessmem of marerial in connection with any arbitration conducted under these flules save that any such person shall be lisble for any conscious or deliberate wrongdoing on his or her par."

Please let me know if these smendments would be acceptable to you.
As you are aware, I have not yer heard from Telecom in relaton to the proposed arbitration procedure. I am expecting to confer whth schorer and Garns represending the claimants on Thuseday 17 February 1994.
Yours sincerely

File note
Telecom Arbitration
```

Date： 18 February 1994
Matter no： 1673136

On 17 February 1994，between the hours of 9：00 a．m．and 1：00 p．m．，I attended the offices of Hunt \＆Hunt for the purpose of having a discussion in reiation to the arbitration rules prepared by Hunt \＆Hunt（the＂Rules＂）．

The meeting started at 9：30 a．m．and in attendance were Gordon Hughes，Peter Bartlett，Ann Garms，Graham Schorer and myself．

## Record of Meeting

Ann Garms started by attempting to read from a letter by R Davey（Austel）but was interrupted．
The history of the negotiations leading up to the fast track settlement procedure（＂FTSP＂）was discussed．

Ms Garms stated that all the Cot Claimants wanted was a commercial settlement of the matter， not an arbitration．The FTSP came out of a proposal put by Mr Schorer to John Holmes and I Campbell．

Mr Schorer stated that the Cot Cases had wanted a loss．assessor and not an assessment procedure prone to＂fine print＂．The proposal put forward by the Cot Cases was not backed by Telecom and subsequently negotiations got off the rails．Then the Austel investigation began and the media became involved．R Davey acted as a facilitator between Telecom and the Cot Cases．Previously， a draft agreement had been put to the Cot Cases which Telecom had stated would not be changed which turned out to be incorrect）．

The FTSP came out of several meetings and was put forward by R Davey．
Mr Schorer and Ms Garms agreed that the FTSP was the agreed way to resolve the dispute between Teiecom and the Cot Cases．

Mr Schorer advocated that instead of having a claim，a break and then a defence being filed，both parties ie．the Cot Case and Telecom should do their presentation at the same time to the assessor．Mr Schorer did not like the arbitration procedure and the procedure he advocated was consistent with his understanding of the FTSP．

It should be noted that the FTSP does not refer to an arbitrator but an＂assessor＂．

Mr Hughes indicated that one party can ask for documents once the arbitration has commenced． Mr Hughes advocated this course of action as more effective and that as apitrntor，he would not make a determination on incomplete information．

Mr Schorer asked Mr Bartlett why the FOI law was not as broad as the discovery procedure．
Mr Bartlett did not answer this question directly but confirmed that he believed it was wider and that documents would．not be partially deleted as was claimed by Mr Schorer．

Ms Garms stated she had three concerns about the Rules as drafted：
（1）causal link；
（2）flow on effects of treatment by Telecom－adequately compensated；and
（3）Telecom＇s liability amended to give assessor the right to make recommendations．

## Causal Link

－－－－In relation to this matter，Ms Garms stated that it was agreed that there would not be a strict application of legal burdens of proof，etc．，in relation to the proving of the loss suffered by the Cot Claimants．Reference was made to discussions with Ian Campbell and two Senators．Ian Campbell admitted that Telecom had been remiss．Ms Garmis stated that Telecoms was in a difficult position and queried the current drafting of the Rules in relation to a requirement that the strict causal approach be applied．

Mr Schorer stated that Telecom was in a difficult position because a lot of the relevant documents either did not exist or had been destroyed．

Mr Bartlett referred to clause 2（c），（f），and（g）of the FTSP in relation to the causal connection． Ms Garms had received advice from R Davey that there was a difference between the FTSP and the old rules that had previously been prepared by Telecoms，（not the Hunt \＆Hunt Rules）．

Mr Schorer accepted that W Smith had been appointed as administrator．W Smith had invited the Cot Cases to talk to the TIO and had requested input in relation to the rules beforehand．Mr Schorer was disturbed that once Mr W Smith was in place，there was a document prepared by Teiecom of proposed rules for the arbitration．Mr Schorer considered Telecoms was already moving away from the spirit of the FTSP．

Mr Bartlett and Mr Hughes both stated that they had not received this document and had not read it and that it was irrelevant．

Ms Germs returned to discussion about causation which was her point no．1．

Mr Hughes expressed his view that the powers of an arbitrator under the Commercial Arbitration Act made an arbitration a more effective way of determining the issues in dispute between the parties.

Mr Hughes stated the problems with an "assessor" were that it was a toothless position and that he was not convinced that it could guarantee the result as either party could withdraw or would not be bound by the result.

Mr Schorer asked if he could pull out of an "assessment" during the process if he did not like the way it was going. Mr Hughes and Mr Bartlett advised that this was not the case as he was contractually bound by whatever the terms of the assessment were.

Mr Hughes stated that an arbitrator had more powers and considering the current facts surrounding the Cot Cases ie. suspicions and the long period of antagonistic negotiations, the adjudicating party would need powers to ensure that all material relevant for the decision was obtained.

Mr Bartlett stated that Telecom and the Cot Cases wanted a method of resolution as a final settlement of the problem - no right of appeal, no resource to the Courts.

Ms Garms agreed with this conclusion.
Mr Schorer stated that he needed documents from Telecom to prepare his case and without this material, he could not go to arbitration. Mr Schorer had raised the issue of documents with Austel and was unsatisfied with Telecom's response.

Mr Schorer stated that there was nothing in the Rules which provided that the Cot Cases were to get the relevant documents. Mr Schorer was disappointed at this stage that since 18 November 19932 of the Cot Cases did not have any documents.

Mr Bartlett stated that this was a reason for starting the arbitration as the arbitrator could order the production of documents.

Mr Hughes stated that he was aware of the dispute between the parties but did not have any idea as to the nature and indicated that from this point in time, there were two ways to proceed in relation to the problem of outstanding documents:
(1) the procedure is put on hold until all the documents are exchanged in accordance with the FOI procedure; or
(2) the arbitration procedure commences and then the arbitrator gives appropriate directions for the production of documents.

| Subject: | Fibre Degradation |
| Date: | Mursday, 16 September, 1993 3:41PM |
| Priority: | High |

You will recall a week or so ago I briefly mentioned that Network Products had experienced difficulties with parts of the optical fibre network and that Gerry Moriarty \& Harvey Sabine (GM - Transmission) had asked that I and suitable external litigation experts consider Telecom's legal position.

My initial preference for external legal support was Russell Berry \& Wayne Condon. Because one of the possible detendant's (Olex Cables) is a division of Pacific Dunlop Lid, Freehill Hollingdale \& Page had a conflict of interest. Due to the firm's commercial litigation expertise and the knowledge it has acquired of Telecom's supply processes through the Switch Vendor Study, my other preference was Molomby \& Molomby. Lindsay Collins \& Nick Nichola were available, Moiomby's had no conflict of interest, so I have brieted Molomby \& Molomby.

Problems were experienced in the MacKay to Rockhampton leg of the optical fibre network in December '93. Similar problems were found in the Katherine to Tenant Creek part of the network in April this year. The probable cause of the problem was only identified in late July, early August. In Telecom's opinion the problem is due to an aculeate coating (CPC3) used on optical fibre supplied by Coming inc (US). Optical fibre cable is supposed to have a 40 year working life. If the MacKay \& Katherine experience are repeated elsewhere in the network, in the northern part of Australia, the network is likely to deveiop attenuation problems within 2 or 3 years of installation. The network will have major QOS problems whilst the CPC3 delaminates from the optic fibre. There are no firm estimates on how long this may take.

Telecom's sources its optical fibre cable from 3 suppliers, Pire\#li Cables Aust Lid, Olex Cables and MM Cables. These 3 suppliers obtain their optical fibre from Optical Waveguides Australia (OWA) [using Corning technology] and Optix [using Sumitomo technology]. To date Telecom has not experienced any problems with cable that uses Sumitomo technology. From October the cable suppliers will only provide Sumitomo sourced cable. Existing stocks of Corning cable will be used in $\psi$ low risk / low volume areas.

Legal involvement at this stage is part of NWP's risk management exercise. It is cleandy understood that any decision to pursue legal options will require senior management endorsement.

Kevin Bruce

\(4 / 6\)

A selected group of staff in New South Wales South \& West Region (Consumer and Country Division) have recently conducted an intensive examination and testing process of cables feeding out of eight rural exchanges. The initial aim was to gather information about the real level of transmission related faults, however, the findings create great concern over the degree of DC faults.

With over 350 working services, and as many spare cable pairs tested to date, it can be said that:
* Any customer beyond the 6.5 dB limit, and thus needing either loading or conditioning, is seriously out of transmission specification. Not a single service has been found which is even remotely close to correct.
* Any service operating on loaded pairs, and terminating in a T200 handset, has serious deficiencies in the sidetone level.
* Any service connected via a rural distribution cable method has a \(70 \%\) chance of having a DC fault (earth, foreign battery or, loss between) sufficient enough to significantly degrade the level of service. An additional \(20 \%\) have DC faults of a less serious degree. That is, \(90 \%\) of services exhibit either a foreign battery, earth, or loss between fault.

Almost \(100 \%\) of rural Elevated Joints (EJ) exhibit a multitude of DC faults caused by poor work standards.
* Unless a new customer is within a few hundred metres from the exchange, it is impossible to find a totally fault free spare pair to use. That is, the fault rate on spare pairs is even higher than on working services.
* Many lengths of cable are being replaced without justification.
* Faults are not being repaired at all - the service restoration method is to transpose around the problem. This applies to faults in joints as well as cable lengths.
* There is a zero level of field staff understanding of transmission testing techniques and operating principles.
* Modern testing equipment, whilst being adequately supplied, is only being used by a minority of staff. And even then, in limited variety and circumstance.
* Lightning strikes are being encouraged by our own actions. Our focus is on quickly getting to the fault rather than preventing the fault. As a result we are ensuring that we get hit by lightning far more often.

\section*{BACKGROUND}

Within the ambit of the Transmission Quality Improvement Project (TQIP), it was decided to survey a number of rural services. Initial discussions with others who have tried to do similar, revealed tat to simply try and measure each service was doomed to failure. Past experience showed that lines normally had multiple DC faults which needed to be repaired prior to any transmission testing.

A team of six staff ( 3 technicians and 3 lines) were selected and then trained. The training consisted of a complete overview of network transmission, dB theory and measurement, hybrid theory, test instruments, fault finding techniques, and cable parameters. Throughout the training period, use was made of "experts" to fully explain each subject. Initially, a classroom environment was used, but then reverting to field training, and practical application.

As a consequence, the staff don't only know about Transmission - they understand it !
A basic work process was developed for the group to follow. This has needed significant modification. and will require more, as the project develops.

The process used is to test all pairs (including spares) from the exchange. Using a Lines Test Set, CZ3000 and Echoflex. DC faults are identified and logged. Then each joint is opened, inspected. corrected, and tested towards the next one. On the rare occurrence that a loading coil is encountered, the circuit is tested with a Simline and HDW T08/3 PET. When lengths which cant be repaired are found (tested with Dynatel 573 and 18B), working services are transposed onto the best pairs, or in extreme cases. a length is run over the ground. When all faults are cleared. long lines are fully tested with the Simline. Sidetone is checked initially by the rather simple "blow/click" method. and if in doubt, an A215 is used to generate 100 dBA CTS into the transmitter, and measured with a Sound level meter at
5. Sidetone testing did not take place on the early test areas. We have now progressed to where we test most long lines, plus those within a few hundrod metres from the SCAX. Therefore, percentage figures are not valid.
6. The figures for earlier test areas are estimates only. eg; the number of remade joints were not counted because it was not expected that the quantity would be so great.
7. All joints which were not fully remade, still required repair work - there has been no single joint found which did not require correction of fauts.
8. Tests on spare pairs are only valid within a short distance from the SCAX. Most spares go to open circuit within one (1) kilometre, and thus, faults detected are within that length. Beyond that, specific figures have not been retained for faulty spares within each individual cable length.

\section*{SPECIFIC and GENERIC EXAMPLES}

Types of problems found in rural cabies and joints include:
No bag over the unsheathed conductors. - this creates insulation breakdown, particulariy on the mates. Joints have been found where some wires were completely devoid of insulation.

Excess sheathing removed. - allows the above problem to occur more rapidly, and to a greater degree. The worst example found had 3 metres (that's right, you didn't read it wrong) of stripped cable inside an EJ.

Wrong size jointing posts. - The standard size post can accommodate up to 30 pairs of 0.90 mm cable, provided that there are only the two cables plus lead-ins. Standard posts with up to 50 pairs or with three or more smailer cables are quite common. The effect is to "jam or squeeze" the conductors so that they are in direct contact with the cover. Over time, the resuits are pairs earthing out on the post, insulation "sticking" to the cover etc.

Twist and sleeve joints on grease cable. - insulation on grease cable is not designed to take the stress of twisting (it breaks the insulation further down the wire). Another similar matter is where the whipping from within the cable has been used to tie off groups rather than using collets. The effect is the same as for twist joinss - the insulation in filled cable cannot take the stress and is quickly damaged.

Faulty connectors - this appears to be a contentious problem. Field staff suggest that a certain percentage of connectors are crook and that they, the users, can't do anything about it. Our tests indicate that firstly, this percentage is very, very low, and secondly, if the joint is completed in a siower and more methodical way, any faulty connectors are easily detected. A finai visual check of the joint will aiso highlight any faulty units which have slipped through. Worse case that has been found so far was a complete cable route where every joint had connectors which hadn't been fully crimped. Clearly someone using either a fauty tool or crimping technique.

Particularly alarming is the number of joints found with clear signs of recent activity (eg: one or two pair with new connectors etc) but with numerous other major fault conditions. It is beyond comprehension to understand why someone would open a joint and see that all pairs were suffering severe insulation breakdown, but then only fix a single pair.

Elevated joints which are prone to damage and/or faults create another conundrum. Examples are where catte continually use our Els as rubbing posts (and that's no bull)- why do our staff just go along and replace the unit exactly where it was? There are many ways to permanently solve the matter.

\footnotetext{
- A further example is where joints are located in bad positions such as swamps. This raises the question of the original design, and then the originat installation, and then the ongoing maintenance. The best example of this is a joint so deep in a swamp that alair of fisherman's waders was needed to get to it. The actual joint was permanently
underwater except during drought conditions ! Unlike most farmers underwater except during drought conditions ! Unlike most farmers across the Nation, those in this area pray for
drought !.

Transposing pairs has created a nightmare of problems. In order to either connect a new service. or to locate a fault, almost every joint on the route needs to be opened this generates a number of "man made" faults for every one cleared. If the cable is kept straight, then new services can be connected by opening only a single joint. Likewise. a fault can be located to the nearest joint and again. onty a single joint disturbed. The findings of the transmission group indicate that the more transpositions which have occurred, then the more faut prone is the cable route.
}

\section*{INFILL FINDINGS}

As a Russian General once said, "the original fail safe master plan only survives until the enemy is first met". And so it was with the CAN transmission group.

The quantity and severity of \(D C\) faults were way beyond expectations. Furthermore, most circuits had multiple faults on them - and many were caused by problems in joints. To date, no single EJ has been found which can be said to be perfectly correct and fault free !

Another complication is the faults which have been proven into cable lengths. Given that the aim is to fix the faults, rather than just replace cables, this has meant a lot of digging and repairing. Obviously not all cables can be repaired. and thus must be replaced. When these are identified, a cable replacement report is submitted.

The greatest loss of time can be attributed to the attitude of "don't fix. just transpose around the problem". The problem is so bad that our process has had to be altered so that stage 1 is to now straighten the cable pairs and clear DC faults. It is quite common to find services working over split pairs; more often than not because of a fault in a joint. These splits are frequently on \(2 \times\) A legs or \(B\) legs - any two wires seem to do: after all, they are only bits of copper! Bad luck about the introduced cross-talk.

Some facts and figures: (with locations identified as \(1,2,3\) etc rather than by name)
\begin{tabular}{|l|r|r|r|r|r|r|r|}
\hline LOCATION & 1 & 2 & 3 & 4 & 5 & 6 & 7 \\
\hline & & & & & & & \\

\hline
\end{tabular}

\section*{NOTES}
1. Location 1 had only 5 services with DC faults over the "Standard SLIQ" levels of 5 volts battery, and 1 Megohm insulation resistance. An additional 28 services had faults of a lower severity.
2. Location 5 was a single route feeding a remote area with all services loaded. This route was used as part of the training program, and thus not fully tested.
3. Location 6: According to plans, the 4 long lines are not outside limits - however, because 0.90 cable has been replaced with 0.64 mm , they now have approx 1 to 2 dB excess loss. These custorners have had their sidetone corrected and there is no need to worry about the loss, given that the lines are maintained with absolutely no DC faults.
4. Location 7 had a cable route which fed through extremely rough mountain country. This cable was in very poor condition with many faults in cable lengths. It was decided because of the high cost of replacing the cable, it was viable to dig and repair far more often than would normally be the case. Even then, a section must be replaced due to the ingress of water.

Don, spent last Friday morning attempting to measure line resistances at Rockbank - but it was abortive because no-one was at the premises, and cant do measurements without someone at the premises. Aim to do the Fish Farm on Wednesday, all being well. Some measurements have been done on the Voice-link cables and they show a slightly higher resistance than theory. After travelling the cable run, I can understand why! The measurements on Friday morning did, however, show that there are significant cable problems between Rockbank exchange and Dawson's premises. Ideal solution is to plow in new cable by shorter foute - I will be talking to John McCoy (CAN) about this.

The measurements are being done by the Power Co-ordination people and they do have other work to do and are short staffed.

I am not aware how Alan H's ringer measurements are progressing, but I suspect they should have been finished by now.

The theoretical analysis is currently being refined to take into account the quirks in ringer installations that keep turning up - refer to earier message about non-standard ringer at Jindabyne South! Parameters for Cape Bridegwater RCM have been obtained, but I don't believe them - I am atternpting to check them. Some of the people supplying this information Disenorr live in "old Telecom" !

Peter.

Peter
I need this more and more every day. When can I get it and which custoemrs will it cover. We need to extend this to all customers covered by teh Austel direction and get it completed by the end of this week.

Don, I will put some words around it today and summarize the resulis in a table and then forward it to you. By then I should have resolved the Fish Farm cable details!

Priority: High
Ross and lan,
This E-Mail is to alert you to a possible regulatory interaction with the current work on "COTS Cases" and ongoing work with AUSTEL on network performance.

As you know, a Ministerial Direction gave AUSTEL power to set end-to-end network performance standards. The AUSTEL Standards Advisory Committee established a working group (designation WG 121) to set these standards, and Telecom has had a fairly hostile reception in this working group.

Yasmin Dugan from my area has been co-ordinating this work, working closely with Network Products (especially Operations) and the Business Units. The AUSTEL staff member leading the group originally wanted a very wide list of mandatory parameters. but after discussion with Bob Horton and a presentation to the Standards Advisory Committee by Yasmin. AUSTEL have agreed to limit the scope of the initial work to the few parameters our customer surveys hand shown as being of most concern. This work is now well advanced.

I believe that the "Service Operation Deemed Satisfactory" Project Team as part of the COTS case work has also been looking at issues relevant to a service specification and testing procedure, and that originally they came out with a large number of parameters to specify and test.

The powers to set mandatory performance standards that AUSTEL has been given could well be used in some sort of regulatory outcome from AUSTEL's current COT case investigation. I believe it is essential that we provide a consistent approach to AUSTEL. I'm hopeful that your team has taken Telstra's corporate position to AUSTEL as the starting point for their work. I strongly request that you give us early advice if for strategic reasons we should change our position with AUSTEL in the SAC and the working group \(12 / 1\).

Standards \& Regulatory Strategy

\section*{Clause 5}

In relation to the lirst paragraph, Telecom seekss amendmenss to provide that the arbiration will commence in retation to each clatmant when that claimant has completed the formalities. It is nor necessary to wath untll all four claimants have completed the formalities.

Recommendattow: agreed.
In relation to the third paragraph, Telecom seelse wo reserve nocmel fighs of appeal ardsing under the Commercial Astiration Act.

Recommendation: agreed.

\section*{Clance 6}

In respect of the first paragraph, Telecom proposes that the arbitratior have the discretion to permit a party's professional consultants to be present, with a reciprocal right for the other party to have im consultants present in such circumstances.

Recommendation: agreed.
Aso in relation to the first paragraph, Ferrier Hodgron proposes that specific mention be made of the right of a member of the Resource Unit to be present, at the arbitrator's discretion.

Recommendation: agreed.

\section*{Clause 7}

Concern has been expressed by the COT Case representatues about the time frame for subprissions.

Recommendatton: I am happy to introduce greater flexibility into the proposed time frame. This cin be achieved by inserting an intral sub-clause to the effect that "the time frames for compliance referred to in this clanse are subject to the overiding discretion of the Arbitrator and suay be the subject of submistion by the parties".

Telecom has suggested that clauses \(7.1,7.2\) and 7.5 be amended to provide each party with the same rights to requera documenss from the other, such requests to be made through the arbitrator and to be subject to the arbitrator's discretion.

\section*{Recommendation: agreed.}

Also in relation to clause 7.5, Ferrier Hodgan suggests that the arbitrator be required to stipulate a time frame in relation to the production of documents.

\section*{Recommandation: agreed.}

In relation to the proctuction of documpents, Telecom recommende a specific exemption for documents protected by legal professional. privilege.

> Recomanvendation: agreed, sublect to the right of the Astitrator to hear submassions on whether particular documents are protected by legal professional petvelege.

\section*{Clasuse 8}

In relation to clause 8.2, Ferrler Hodgson suggests a re-wording to make it clear that the arbitratior will notify the parties in advance of any proponed inspection or examination by the Resource Unit and that the arbitrator should heve the discretion wo seck submissions from the parties in relasion to finding of fact arising out of such inspection; Commenting on clause 8.4, Telecom believes the arbierator should disclose to the parties all advice recetived in conssulation with the Resource Unis (ie interprecative conclusions as well as findings of fact).

Recommendatton: agreed.

\section*{clanse 9}

Telecom objects to the clatms being heard together as each case may involve different considerations of fact.

Recommendation:
given that the claims will-be heard simultaneously, the arbitrator should by leave of the parties concemped have the right to transpese common findings of fact from one case to another in appropriate circumstances.

\section*{Clause 10}

The Claimants seek a speelic reference to chause 2(B) of the Fast Track Settlement Proposel in the opening lines of clause 10 so as to clarify the parameters of the arbistator's powers of assessment under this procedure.

\section*{Recommendation: agreed.}

The Claimants seek the deietion of clause 10.2.3 on the grounds that the wording of ciause 10.2.2 directly reflects clause \(2(5)\) of the Fast Trick Seriemenx Proposal and is therefore adequate.

\section*{Recommandation: agreed.}

\section*{Clause 16}

The COT Case representatives heve, subsequent to the meeding on 17 Pebruary, withdrawn their objection to this cleuse.

Telecom has proposed additional provislons requinting formal confidentialty undertaking to be signed by all percons who are prtvy to the proceedings.

Recommendatton: agreed.
Clauce 19
Telecom ts not satistied whith the propoeal that in the event of a breach of confidentiality, its damages arising from the breach will be determined by an independent arbitratoc. Telecom proposes that in the event of unauthorised disclosure, any obligations imposed upon Telecom pursuant to the procedure should be rendered null and vold and any moneys paid to the claimants should be refundable.

Becommendation: agreed.

\section*{Clawse 23}

Telecom recommends that persons authorised to receive notices be specifically identified.

\section*{Recommendation: agreed.}

\section*{Clanse 24}

The Special Counsel and members of the Resource Unit seek an exchusion from liability for any act or omission, to the same extent as the arbturator.

\section*{Recommendatton: sgreed.}

\section*{New Clause 25}

Telecom seeks a reburn of documents within 6 weeles of publication of the award.

Recommendation: agreed.

\section*{Scheotulo A}

The Claimants seek specific reference to cipuse 2(c) of the Fast Treck Setuement Proposal (or a replication of the wording of that clause) in Schedule A.

Recommendation: agreed,
scivedule \(E\)
If Telecom's proposals regarding clause S are accepted, this Schedule would be deleted.

Recommendation: agreed,
```
