Dear

Dear _____

I will keep this letter short and direct and to the point as you are well aware of my telecommunication problems.

The South West Tourism promotion campaign in Melbourne early next year. I am the proprietor of a bus charter company and I am planning next year.

How ever with farness to the company I would have to be able to guarantee this proposition I would have to be able to guarantee reliable phone service. This company has over many months tried to contact me without such success hearing an engaged signal constantly before making contact, and they are well aware of my past problems. I am under the assumption my telecommunication problem has been rectified which I hope

I have explained I am under the agency
problems are now over or at least just about rectified
is the case.
If Telecom would now guarantee me an efficient service I can pursue this
tender, could you Mark or your Victorian Divisional Manager write me
confirming this guarantee.

I am counseling on this venture to not only boost but an awareness of our local tourism exists. I would need this letter know latter than 18th of September as offers of interest must be in by then, if this could be arranged I would be obliged.

Respectfully

Respectfully,

Allen Smith
