RESOURCE UNIT TECHNICAL EVALUATION REPORT

Mr. Alan Smith of Cape Bridgewater Holiday Camp

30 April 1995

Introduction

This document is DMR Group Inc.'s (Montreal, Canada) and Lane Telecommunications Pty Ltd's (Dulwich, South Australia) Technical Report on the Cape Bridgewater Holiday Camp COT case.

It is complete and final as it is.

To establish the context for our technical evaluation, we preface it with our positions on three specific details in Telecom's Service History. This is followed by a statement about other documentation which has been provided by both parties. And we provide a characterisation of the level of service which a customer such as Mr Smith could reasonably have expected.

Sections 1 and 2 itemise problems with Telecom's service to the Cape Bridgewater Holiday Camp in the period from February 1988 to October 1994. There were several different problems, sometimes more than one at a time, with several different causes. These are summarised in the Timeline at the end of the Introduction. They include:

- congestion
- low capacity
- exchange fault
- transmission equipment (RCM) faults
- calls wrongly directed to RVA (Recorded Voice Announcement)
- sundry reports with "no fault found" at the time
- Telecom testing
- programming error
- uncompleted 008 calls
- others.

Section 3 addresses the issue of problems with CPE (Customer Premises Equipment). It is not always clear to the customer where to draw the line between CPE and proper Telecom responsibilities, and Telecom did not succeed in making it clear to Mr Smith.
