At todays Council Meeting the TIO reported on his involvement with the COT settlement processes - it was agreed that any financial contributions made by Telecom to the COT arbitration process was not a matter for Council but was a private matter between Telecom, AUSTEL and the TIO.

I hope you agree with this.

Don

seems OK to me.  
when I spoke to Darwin I suggested that at least for the first group he develops a separate budget, clears with us, approves bills for payment and we pay direct.  
when we have had experience with this can decide to continue for group 2 and future
