

## Alan's Copy

Sections 4 and 5 are an impact assessment and summary. We have ascertained that there were times when the service provided by Telecom to Mr Smith, quite aside from problems with CPE, fell below a reasonable level. These times ranged in duration from years in some cases, to 18 months in one case, to an estimated 70 days in one case, to shorter times in other cases. These durations of poor service were, in our judgement, sufficiently severe to render Mr Smith's service from Telecom unreliable and deficient.

### Cape Bridgewater Documentation

The "Fast Track" arbitration proceedings are "on documents and written submissions". More than 4,000 pages of documentation have been presented by both parties and examined by us. We have also visited the site. Not all of the documentation has real bearing on the question of whether or not there were faults with the service provided by Telecom. We reviewed but did not use Mr Smith's diaries (Telecom's examination of Mr Smith's diaries arrived in the week of 17 April 1995). Like Telecom, we separate the problems caused by Mr Smith's CPE from those in Telecom's service and concentrate only on the latter. A comprehensive log of Mr Smith's complaints does not appear to exist. ↙

The Technical Report focuses only on the real faults which can now be determined with a sufficient degree of definiteness. We are not saying anything about other faults which may or may not have occurred but are not adequately documented. And unless pertinent documents have been withheld, it is our view that it will not be feasible for anyone to determine with certainty what other faults there might or might not have been.

A key document is Telecom's Statutory Declaration of 12 December 1994. Without taking a position in regard to other parts of the document, we question three points raised in Telecom's Service History Statutory Declaration of 12 December 1994 [Ref B004].

### "Bogus" Complaints

First, Telecom states that Mr Smith made "bogus" complaints [B004 p74, p78, Appendix 4, p10]. What they mean is his calls in June 1993 from Linton to test Telecom's fault recording. As others have indicated (see Coopers and Lybrand Review of Telecom Australia's Difficult Network Fault Policies and Procedures, November 1993, p6) "Telecom did not have established, national, documented complaint handling procedures [...] up to November 1992," and "documented complaint handling procedures were not fully implemented between November 1992 and October 1993." Furthermore, [p7] "fault handling procedures were deficient." Smith's June 1993 calls from Linton were, as he has stated, to test Telecom's fault reporting procedures, because people who had been unable to reach him told him that Telecom did not appear to be doing anything when they reported problems. We find Smith's tests in this instance to be unlikely to effect any useful results, but the term "bogus" does not apply.

There were occasions when Mr Smith mistook problems with his own CPE for Telecom faults, but this is a normal occurrence in the operation of any multi-vendor system, which the end-to-end telephone system increasingly is. Telecom takes pains to separate these CPE problems from the legitimate faults, which they acknowledge.

We are not saying anything about other faults which may or may not have occurred but are not adequately documented. And unless pertinent documents have been withheld, it is our view that it will not be feasible for anyone to determine with certainty what other faults there might or might not have been.

One issue in the Cape Bridgewater case remains open, and we shall attempt to resolve it in the next few weeks, namely Mr Smith's complaints about billing problems.

Otherwise, the Technical Report on Cape Bridgewater is complete.

A key document is Telecom's Statutory Declaration of 12 December 1994. Without taking a position in regard to other parts of the document, we question three points raised in Telecom's Service History Statutory Declaration of 12 December 1994 [Ref B004].
